

Our heat exchangers help drive almost every major power plant in North America.

Think about ITT.

There's a reason ITT Standard heat exchangers are found in just about every major power generating plant in North America. Actually, lots of reasons. Like quality. Reliability. Innovation. And experience. For more than 90 years, we've been the preferred supplier of heat transfer solutions to the power industry, with innovative shell & tube and plate type heat exchangers that meet and exceed industry standards, including the stringent requirements of Section III and Section VIII of the ASME Boiler and Pressure Vessel Code. And we've changed with industry needs, growing and innovating along the way.

So as your needs grow, turn to the source that you can rely on today, tomorrow and beyond: ITT Standard.

Find out how ITT Standard can meet your needs, too, by going to www.ittstandard.com or calling 1.800.281.4111 today.
